WHO ARE WE

InfinityCs is an emerging IT firm in Sri Lanka producing world-class quality software for its clients since 2017. We provide a truly wide range of IT solutions across every function of a business. Our IT solutions help improve business performance in several functions. – from core functions like Finance, Accounting and Human resources – to very specialized functions like Legal and Compliance – and miscellaneous services.

Powered by cutting-edge technology and a dedicated team of associates, we offer bespoke IT solutions tailored to the idiosyncrasies of every business' unique needs. We operate as an extension of your own team, sharing the same passion that drives every action that our clients perform. The breadth of our IT solutions covers every corporate requirement that our clients could possibly have, irrespective of industry, size, location and complexity.

We believe that our job is to listen, research and understand the requirements unique to each individual business. In fact, it is the long-term relationships with our clients that has served as a solid foundation for our company.

OUR GENESIS

InfinityCs was born out of the dire and constant need for a variety of services that would make businesses more efficient and effective. It is incorporated as a private limited company under the Companies Act No 7 of 2007. InfinityCs' founders have decades of experience working within large corporations, where they developed a perspective of how corporate services play a part in nearly every facet of a business' activities.

WHAT DO WE STAND FOR

We are guided by the three pillars of our Mission, Vision and Values. Every action we perform, every client interaction we are part of, every service we provide and every stakeholder we touch – we make sure we stand true to these guiding pillars.

VALUES

- Integrity
- Quality
- Competence
- Trust
- Transparency

"

To be the trusted partner of choice for local and global corporations, providing them the best IT solutions, that make a significant impact on their business.

"

VISION

"

To help our clients operate more efficiently and effectively by providing affordable, customized IT solutions across every function of their business.

"

MISSION

MOBILE APP DEVELOPMENT

Customers today are on the move and use mobile applications to access information. Hence, mobile applications play an important role in today's mobile first world. Businesses understand that mobile apps allow customers to have all their information at their fingertips. Also, it is important that their app supports multiple mobile application platforms. InfinityCs' understanding of mobile technology on various platforms help us empower businesses to provide better service to their customers and enhance operational productivity.

Our Platforms are;

- Android
- iOS

WEB APPLICATION DEVELOPMENT

InfinityCs specializes in building web applications ranging from static use to e-commerce functionality. We have extensive experience of creating web applications for a plethora of varied businesses and can use our learning and experience to provide easy to use applications. We can create fully functional web applications quickly to put clients on the online map, and then further refine the application based on user experiences and feedback. We also provide application support and maintenance packages which take care of incremental add-ons to existing applications to accommodate addition of new pages, modification of pages and streamlining information flow.

DIGITAL MARKETING & SEO

The InfinityCs' digital marketing strategy provides end-to-end solutions to enterprises who are seekingto ensure efficiency and effectiveness in their digital marketing efforts. Our teams work with CMOs to aid in leveraging multiple channels to engage the consumer, build long-term relationships and harness the explosion of data while measuring and increasing the ROI of digital marketing. Our digital marketing offerings encompass cross channel integration to engage the consumer, harness consumer data, generate insight and measure business value.
